

Mark schemes

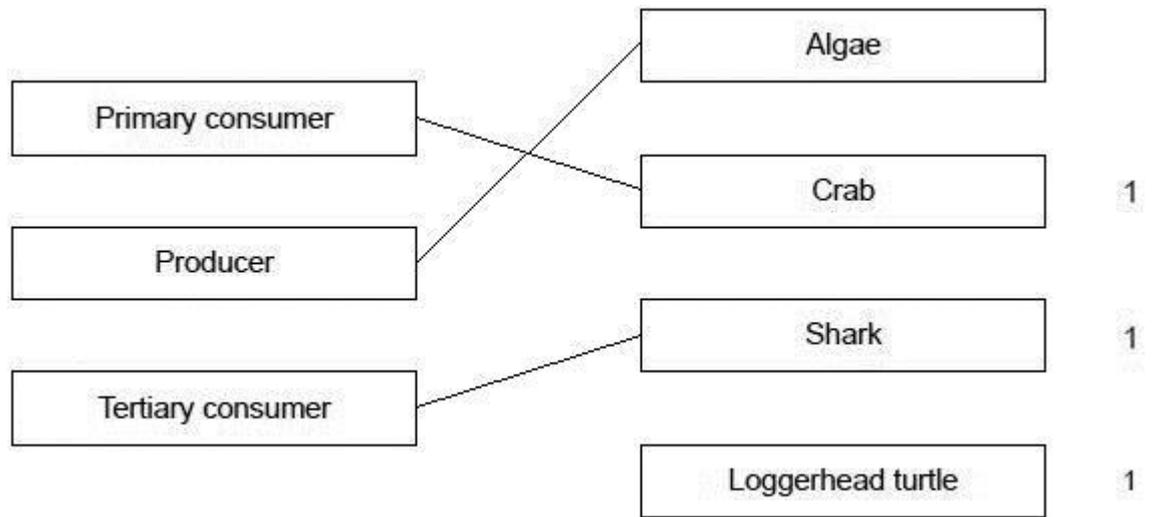

Q1.

- (a) controlling water output in urine 1
- keeping cool on a hot day 1
- (b) pituitary 1
- (c) $(8.4 - 5.2 =) 3.2$ (mmol/dm³) 1
- (d) diabetes 1
ignore type of diabetes
- (e) the pancreas is not releasing insulin 1
- (f) change diet 1
allow description of suitable diet change e.g. use sweetener in hot chocolate, eat less sugary / starchy food or stop eating sugar-coated cereal
- take more exercise 1
allow description e.g. go to gym instead of reading and TV, walk / cycle to work
allow change to an active job
if no other marks awarded allow 1 mark for lose weight.

[8]

Q2.

- (a)

additional lines from a box on the left negates the mark for that box 1

- (b) population 1
- (c) the number of (loggerhead) turtles will decrease 1
ignore (loggerhead) turtles die
- because there will be less crab to eat 1
allow less food
- (d) biotic 1
- (e) (as) length of the turtle increases, the number of eggs laid increases 1
allow the number of eggs increases as the length of the turtle increases
allow size for length
allow positive correlation
- (f) (as sea levels rise) the numbers will decrease 1
allow extinction
- as there will be fewer beach(es) to nest on 1
allow the beach they normally return to may be underwater / flooded
allow fewer egg laying sites available
allow eggs may be washed away
- (g) 2.6 1
- (h) burning wood on a fire 1

travelling by aeroplane

1

[13]

Q3.

(a) any **two** from:

- (same) number of scoops / sweeps each time
allow any idea of controlling sweeps e.g. for same time
- scoop / sweep (at same) distance from the edge of pond
allow scoop / sweep at the same place
- scoop (at same) depth
- (same) size of net
- (same) gauge / mesh size of net

2

(b) 64

1

(c) 19 to 122

allow 122 to 19

or

103

1

(d) water fleas were not evenly spread (around the edge of the pond)

allow any description of this such as more water fleas near the vegetation

1

(e) more water fleas live near the edge of the pond

allow more water fleas live where there is vegetation

allow converse if student's calculated answer to part (b) was less than 12

1

(f) 35

1

(g) 37.5 (%)

allow 38 (%)

1

(h) there was a high(er) level of pollution (in the pond in 2016)

1

because there are no / fewer mayfly nymphs
or

because there are fewer freshwater shrimps

data must be comparative

1

allow converse for 2014

(i) any **two** from:

- famine / food insecurity
- water shortage
- landfill sites filling up
- acid rain
- deforestation / habitat destruction
- extinction of species

or

- reducing biodiversity
- natural resources running out

ignore global warming and any water pollution

references such as sewage or eutrophication

2

[12]

Q4.

(a)

Factor	Biotic	Abiotic
Diseases	✓	
Herbivores	✓	
Temp		✓
Water		✓

allow 1 mark for 2 or 3 correct

2

(b) (leaves block light near tree so) more light (as you move outwards)

allow low light intensity under tree

ignore Sun

1

for photosynthesis

allow less photosynthesis under the tree

1

(which) produces (more) glucose / proteins (for growth)

ignore growth

ignore food

allow molecules, cell components or other correct substances instead of proteins

if no other mark awarded allow less water / ions / minerals / nutrients under the tree

1

(c) quadrat

correct spelling only

- 1
- light meter
- allow lux meter*
allow light intensity meter
allow light data logger
- 1
- in this order*
- (d) 1.5(0) (m²)
- allow 15 000 cm²
- 1
- (e) to keep light (intensity) as similar as possible
- allow the light (intensity) might change*
ignore references to temperature
ignore weather
ignore Sun
- 1
- (f) any **one** from:
- repeat (investigation) around the tree
allow repeat in different directions
 - repeat (investigation) for other trees / areas
 - sample every one metre
 - count the number of each species present (rather than percentage cover)
ignore repeats unqualified
ignore repeat at different times / days / seasons
ignore different size quadrat
ignore random sampling
- 1
- (g) daisy
- 1
- (h) as light (intensity) increased so did the percentage / cover of plants
- ignore directly proportional*
ignore positive correlation unqualified
- 1
- up to 100% / maximum at 175 (arbitrary units)
ignore distance
- 1
- (i) any pair from:
- (lack of) water / rain (1)
- because the leaves are stopping the rain
or
because the roots of the tree are absorbing it (1)
allow soil moisture

- (lack of) minerals / ions (1)
allow magnesium / nitrate / nutrients
 because the tree (roots) have absorbed them (1)
 - temperature (1)
allow too cold / cooler
 because less thermal energy from the sun is reaching under the tree canopy (1)
allow 'heat' for thermal energy
allow pH / acidity (1)
because (some) fallen leaves are acidic (1)
- 2
- ignore carbon dioxide*
*do **not** accept oxygen*

[15]

Q5.

- (a) homeostasis 1
- (b) by hormones 1
- by nerve impulses 1
- (c) any **one** from:
- *ignore water*
 - temperature
 - (blood) glucose / sugar (concentration)
allow pH / ions / salts
allow oxygen or carbon dioxide 1
- (d)
- an answer of 600 (cm³) scores 2 marks*
- 2000 – 1400
allow 800 – 200 1
- 600 (cm³) 1
- if no mark awarded allow (600 + 1000 + 400 =) 2000 for 1 mark*
- (e) more sweat (on hot day) 1
- cools the body

1

$$(f) \frac{750}{3000} \times 100$$

1

25 (%)

1

an answer of 25 (%) scores 2 marks

[10]

Q6.

Level 3: Relevant adaptations are identified, given in detail and logically linked to form a clear account.	5-6
Level 2: Relevant adaptations are identified, and there are attempts at logical linking. The resulting account is not fully clear	3-4
Level 1: Adaptations are identified and stated simply, but their relevance is not clear and there is no attempt at logical linking.	1-2
No relevant content	0
<p>Indicative content</p> <ul style="list-style-type: none"> •a small SA:V ratio •means less thermal energy transferred to surroundings •thick fur <p>or hollow hair shafts</p> <ul style="list-style-type: none"> •traps a layer of air which acts as an insulating layer stopping transfer of thermal energy •a layer of fat or blubber under the skin •acts as an insulating layer <p>or as a food store for respiration when food is in short supply</p> <ul style="list-style-type: none"> •small ears •reduces surface area for thermal energy transfer •white colour •camouflage in the snow so prey do not see them coming and they get more to eat <p>or so predators do not see them and they can escape</p> <ul style="list-style-type: none"> •large feet •to spread weight over snow so they can run faster 	

<ul style="list-style-type: none"> •hibernate in winter •to conserve energy stores allow 'heat loss' for transfer of thermal energy	
---	--

6

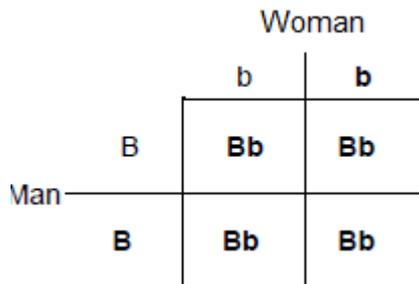

[6]

Q7.

- (a) (i) correct parental genotypes (man BB and woman bb)

1

all offspring Bb

ignore 'brown' or 'brown eyes' on diagram

1

- (ii) they have one B / dominant allele / heterozygous

or

B / brown allele / dominant allele is expressed even if only on one chromosome

1

- (b) correct parental genotypes (both Bb)

can be shown in a diagram

can be shown as gametes

1

correct derivation of offspring genotypes from gametes

allow correct derivation from wrong gametes

1

bb identified as blue-eyed

1

[6]
